

Made in JAPAN

SUPER CORONA CLUB™

Ecology and gentle fiber to the earth and us.

- 🌿 Raw Material: 100% selected high-quality Japanese pulp only used.
- 🌿 Tenacity and elongation are way upgraded with keeping soft touchiness compared to regular viscose rayon.
- 🌿 Great affinity for both natural and synthetic fiber, widely available by blended spinning.
- 🌿 Available denier: 0.9dtex to 2.2dtex to apply for multifarious clothing, like underwear, sweater
- 🌿 Superior water-absorption compared to cotton, High anti-static property.
- 🌿 Biodegradability because of 100% natural material origin.
- 🌿 No harmful gas exhausting when burning because of regenerated fiber made from 100% natural cellulose.
