

“The Fabric” using Daiwabo polypropylene fibers

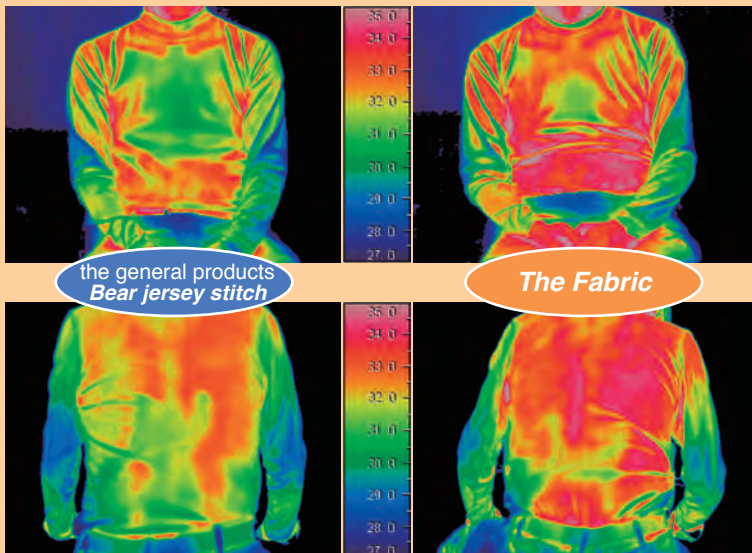

It is an eco-friendly high-function material which has both of the polypropylene’s features, lightness and warmth.

What is polypropylene fibers?

- Light and warm material with no moisture content and high heat-retaining property.
- Eco-friendly without any harmful substance emission such as dioxin during incineration.

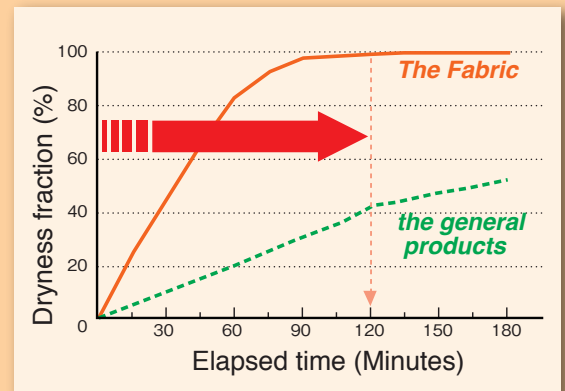

WARM *The Fabric* maintains the cloth temperature

The thermograms during exercise (at 5 minutes after starting exercise). The data show that **The Fabric** maintains the cloth temperature during exercise higher than the general products.

QUICK DRYING

Each product was washed, dewatered, and dried under the same conditions. The product using **The Fabric** is easier to dry; and, in about two hours, it is almost completely dried and can be worn.
